

Logical thinking skills for smarter problem solving.

Effective Problem Solving

A hands-on workshop for analysis and logical understanding of complex business challenges

This hands-on workshop builds the skills to approach complex problems, analyze them clearly and develop ways towards optimal solutions and well-reasoned decisions. It provides a practical toolkit to turn complex challenges into clear, structured, well-communicated solutions.

Build structured logical thinking skills

Navigate a structured problem solving process and master complexity

Conduct comprehensive problem analysis

Develop clear solution options and find optimal solutions

Make better decisions with logical reasoning

Goals & Results

How?

Build the Skills to Approach, Analyze and Solve Complex Problems with Confidence

Session 1

Structure & Analyze Problems

- Discuss the meaning of problem solving as a skill relevant to the future
- Identify all required competencies for problem solving
- Learn and understand structured problem solving processes and general structuring concepts
- Define the real problem behind the symptoms
- Break complex challenges into logical parts
- Identify root causes, obstacles and key drivers
- Prioritize what matters most for solving the problem

Session 2

Decide & Turn Solutions into Action

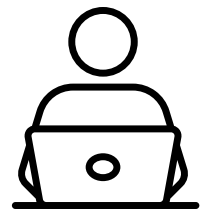

- Develop solution options with structure and creativity
- Learn best practices and creativity techniques
- Evaluate alternatives by impact, effort, risk and feasibility
- Make confident decisions even under uncertainty
- Communicate your recommendation with clear storytelling
- Translate the solution into concrete implementation steps considering change methods

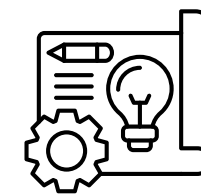

Organization & Formats

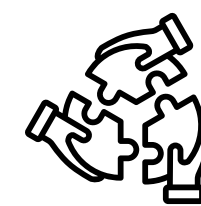

**1 day workshop divided
into 2 sessions**

**In-person / remote sessions,
as preferred**

**Structured templates,
blueprints & exercises**

**Group workshop, individual
follow-up coaching & exercises**
